## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches a reflective-type liquid crystal display and the forming method of a reflective-type liquid crystal display comprising various elements and steps as claimed, more specifically, as the following:

at least one of the transparent electrode and the reflective electrode having an amorphous carbon-containing layer (or diamond-like amorphous carbon layer) adjacent the liquid crystal material (passivation layer using amorphous carbon-containing layer), and such amorphous carbon-containing layer having a resistivity between  $10^4$  and  $10^{11}$  ohms-cm as shown in Fig.5A [claims 1, 3, 8, 10, 15 and 17].

The closest references such as Yasukawa discloses a structure of a reflective liquid crystal having passivation layer on the transparent electrode; Omori discloses the material of a passivation layer can be amorphous carbon, but such passivation layer used in thin film circuits that does not specific used in a reflective liquid crystal display.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2871
